A new approach to careers education

Did you know?

50% of Year 8 students lack ambition and are confused about what they want to do when they leave school?

Schools and colleges have limited resources to provide students with the 1-2-1 support that they need.

What if, in just 45 minutes, you could take your students from “I don’t know” to increased career confidence and 5-10 job possibilities, and save time and make your resources go further?

“The most innovative and exciting approach to careers in the UK”

The Careers & Enterprise Company

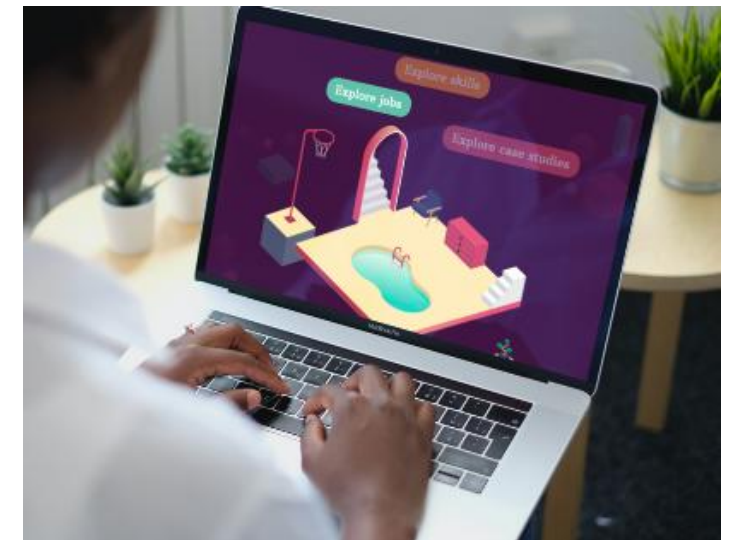

What is the Curiosity Museum?

The Curiosity Museum is a playful careers thinking space and introduction to careers for young people aged 9+ & college students aged 16+.

The Curiosity Museum aligns with Gatsby Careers Benchmarks 1,2,3,4,5 and 8.

Forget the usual careers-journey quizzes and checklists. With the Curiosity Museum, teachers can understand the skills and motivations of their students, ensuring that each student gets the individual support that they need to start their careers journey.

The Curiosity Museum is available as a live pop-up workshop and a web-based digital experience. Or... choose a combined Live and Digital experience programme for maximum impact!

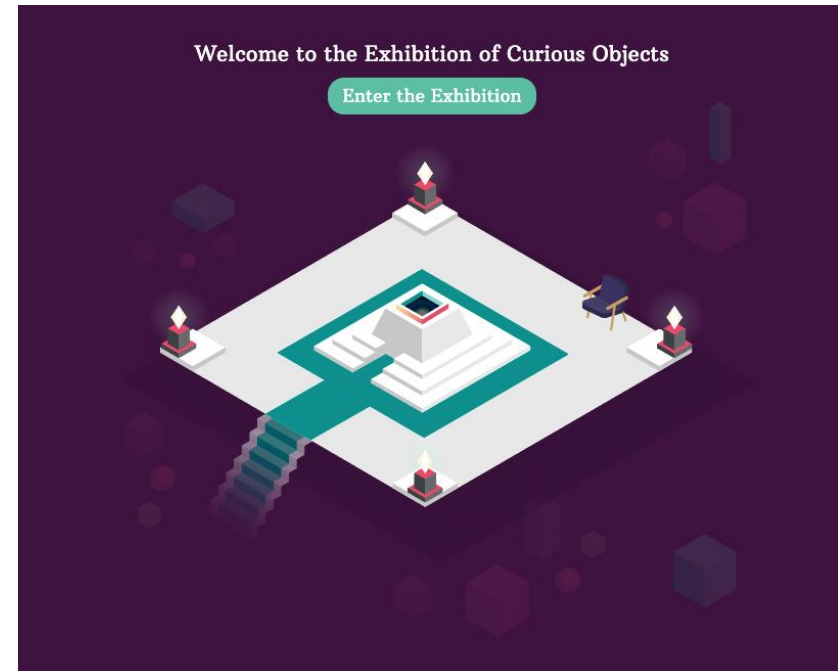

What were the most important things students learned from visiting The Curiosity Museum Online?

“I learnt that there are multiple options for me in the future that involve skills I like to do now.”

“What is needed to take the career path that I am interested in.”

“I learnt more things about the skills and qualifications needed to be an actress and became more confident about thinking about my career path.”

“What I need to do to be a journalist.”

“It’s like magic!”
Participant, Redditch Library

*“This has been the best day
I have ever had in school.”*
Student, Tenbury Ormiston Academy

How does the Curiosity Museum work?

Our powerful coaching process gets to the heart of what students are good at and what they enjoy.

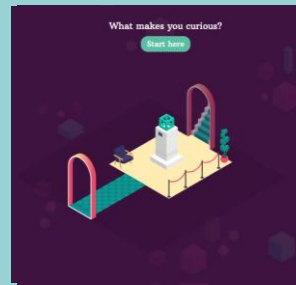

Each student creates a personalised action plan containing a research and development pathway for them to follow.

Students explore three zones, picking a museum object that takes them on a journey to uncover their skills and job possibilities.

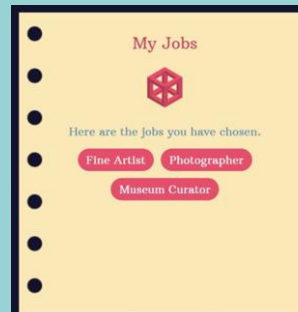

The three zones

Curiosity Zone

Discovery Zone

Future Zone

Jobs are explained in short films and animations, including interviews with young adults who share their personal career insights and advice for pupils.

- ✓ Provides individual support: student-led and flexible to the needs of each student
- ✓ Increases confidence and motivation: self-led process empowers students
- ✓ Helps teachers to understand student interests: review on teacher dashboard and student plan
- ✓ Easy to use: self-led and whole class options plus extension activities

Evidence-led education

We specialise in research-led creative programmes.

In Nov 2021, 150 students took part in our trial. After experiencing the Curiosity Museum:

- 89% of students were more aware of career options
- 70% of students experienced increased career motivation
- 50% of students left with increased confidence

We've worked with 4,500+ enthusiastic young people since we launched Curiosity Museum Live in 2017.

Equal Vision CIC's mission is to create inspiring and exciting cultural programmes in response to real issues such as rural isolation and social mobility. We believe that art has the power to enrich lives – raising aspirations, building stronger communities and breaking down barriers.

As a social enterprise, we want to work with as many young people across the UK as possible, so we're committed to keeping costs affordable.

Our partners and supporters

Curious?

give your students the chance to
let their curiosity grow

**“A really interesting, engaging and different way of
opening up conversations about students’ futures.”**

Lee Overton, Church Stretton

**“The Curiosity Museum enabled students to explore
their ideas, identify future goals and have FUN!”**

Dee Waters, Hereford Academy
